## FairPoint Business Phone Systems

For years, companies like yours have trusted FairPoint to provide high-quality business telephone systems for their offices. Whether your needs are simple or complex, we can offer the best system for your needs at the best price – complete with a wide range of features, expert installation, training and ongoing technical support.

### FairPoint Business Phone Systems features:

- > **Centrex** – Centrex provides reliable, flexible phone service designed to meet your company's specific needs. With FairPoint Communications' Centrex service you'll be free from the headaches of managing and upgrading your own telecom equipment while gaining connectivity to your customers.
- > **Business Key Systems** – FairPoint Business Key Telephone Systems are designed to offer your business state-of-the-art telecommunications equipment renowned for high quality and reliability. Whether your needs are simple or more complex, FairPoint can deliver a system to meet them, along with the built-in flexibility for future growth.
- > **VoIP** – Our business telephone systems have everything you need to take your business to the next level. With cutting edge networking capabilities, you can link remote locations to operate transparently as a single entity. Voice Over Internet Protocol (VoIP) offers state-of-the-art convergence technology that allows you to make voice calls over your existing intranet.
