

high-speed internet & networking

High-Speed Internet & Business Networking features:

- > **Business Networking** – FairPoint can help you configure the right services to make your business more competitive and productive. Use us when you need to install data wiring, connect remote offices with point-to-point T-1 services, or setup VPN services for remote employee access. Simply choose the options that fit your needs, and do it with greater peace of mind because every FairPoint solution offers equal amounts of speed, security and service.
- > **Dedicated Internet T-1** – FairPoint's Dedicated Internet can provide your company with faster download and upload speeds, a continuous Internet connection, and the ability for a medium-to-larger sized business with many employees to share a single connection. Our state-of-the-art network allows us to provide our Dedicated Internet customers with unparalleled reliability and transmission speed.

FairPoint High-Speed Internet & Business Networking

Faced with an ever-changing Internet, you need an Internet service provider that is fast, flexible, and most importantly; reliable. FairPoint Communications offers the right connections for the way you do business. From DSL to wireless, we can provide your business with smart, efficient solutions for accessing the web, connecting remote offices, and streamlining your daily business operations.

- > **High-Speed Internet** – When you subscribe to FairPoint's High-Speed Internet, you connect to the Web via a single line and get the speeds you need. With three different service options to choose from, including our **Starter**, **Standard** or **Premium** packages, this service is great for small to medium-sized businesses, and allows you to select the correct amount of bandwidth at the price that fits your budget. Each package comes with a host of value added features, including:

- Unlimited Usage
- Email Accounts
- Web-based Email Access
- Enhanced Spam Filtering
- Enhanced Virus Protection
- 24x7 Technical Support
